Rationale	<u>Enduring Understanding:</u> Management of the classroom and student motivation are essential for quality students to learn well. This unit is designed to assist pre-service teachers to investigate understandings of classroom management and student motivation as they engage with a range of models and theories of management and motivation including principles to guide management practices appropriate for secondary school learners including students from Aboriginal and Torres Strait Islander and other cultural backgrounds. The nature of adolescent learners is quite broad within secondary contexts and strategies need to be directed to specific learner needs. This unit will then lead pre-service teachers to develop personal theories of practice in relation to the motivation and management of secondary learners (7-12). This second professional experience unit will see a continued development of planning, teaching, organisational skills and reflection for personal growth as pre-service teachers continue to plan and teach individual lessons, consecutive lessons and full days of continuous teaching. There will also be a focus on organisation, motivation and management in secondary school contexts.
Prescribed text(s)	Selected readings will be available via the Moodle™ site for this unit.
